Back at ya. Looking good, with a few more refinements, and answers to your Qs in margin.

On the first item, no intent to quibble on the grammar of NAS! ☺ But I think the deal is they use plural when referring to the umbrella org over ALL academies (like top of their webpage)... and since there are multiple (science, engineering, etc), then it becomes plural. But each academy on its own is still singular. Three examples from their own site.....

“...listing of planned report releases from the **National Academy of Sciences**, National Academy of Engineering, Institute of Medicine, and National Research Council.”

“Copyright © 2016 **National Academy of Sciences**. All rights reserved.”

“**National Academy of Sciences** Project Staff..... Ray Wassel.....”

So I finally found the right document; this is the one that came after we accepted all of Lek's changes. I think you captured it in the edits you made.

Also, I accepted almost all of your changes (and explained where I didn't) and added another couple of questions.

Almost there!

Thanks,

Toby

I took a quick swing at all of these, while I had open, even before you find prior version (which was greatly condensed, to my recollection?). We probably need to go back and forth one more time?

Dan
